

KAILASH CANCER HOSPITAL & RESEARCH CENTER, GORAJ

www.greenashram.org

Mission :

The mission of KCHRC is to provide the best quality medical facility to every section of society irrespective of religion, caste and financial status. Treatment is provided solely on humanitarian grounds through outstanding strategies for early Diagnosis, Treatment, Rehabilitation, Pain relief and Terminal Care. This multidisciplinary approach integrates Patient Care, Prevention, Research and Education for trainees, professionals, employees and the public.

Vision

We shall be the premier cancer center in India, based on the excellence of our team, our research-driven patient care and technology.

Comprehensive Cancer Care

SURGICAL ONCOLOGY

Many advances have taken place in every specialty. In surgery, concepts have changed taking into account the biology of cancer.

Radical surgeries have yielded place to more conservative surgery with the very important objective of quality of life, conserving function and organ without compromising overall survival outcomes.

MEDICAL ONCOLOGY

Chemotherapy has played a very major role, with new drugs and clinical protocols investigated in clinical trials.

This has been possible due to better total supportive care using newer antibiotics, nutritional, blood transfusion support and nursing.

RADIATION ONCOLOGY

Radiation therapy department has also made rapid advances with high technology, precision, computerisation and newer isotopes for therapy.

Recently with the installation of TRUE BEAM STX linear accelerator and unique accelerator, department has matched its need of quality as well as quantity.

- ✓ Technically India's first most advanced system with high definition MLCs / image guided RT
- ✓ Capable of Rapid Arc/VMAT
- ✓ Capable of stereotactic radiosurgery and ablative radiotherapy
- ✓ India's most advanced gated Radiotherapy

RADIO DIAGNOSIS

The department of Radio-diagnosis plays a vital role to cater the needs of several departments including the surgical, medical and radiation oncology departments.

At KCHRC, the Department of Radio-diagnosis has, since its inception, upgraded its equipment and maintained it at the cutting edge of technology.

The latest upgrade features the induction of several new state-of-the-art imaging modalities such as, CT Scan, Colour Doppler, digital Imaging and Angiography and Digital Spot Mammography with stereotactic breast biopsy which will enable the department to step into the new millennium as a modern, fully equipped imaging department.

NUCLEAR MEDICINE

The inclusion of PET CT scanner has improved the staging and has helped in radiotherapy planning for better management of advanced stage cancer patients

PATHOLOGY

Pathology has progressed from basic histopathology to molecular pathology with emphasis on predictive assays for identifying the high risk prognostic factors.

ANESTHESIA AND CRITICAL CARE

The Department comprises of the Anesthesia Service, Intensive Care Unit and Pain Service.

The department is recognized nationwide for its expertise in the anesthetic management of surgical, diagnostic and therapeutic procedures, pre- and post operative care including pain therapy and intensive care of cancer patients.

The department attracts several qualified anesthetist from different parts of the country who wish to undergo advanced training in different areas.

Awards

- ✓ AMERICARES SPIRIT OF HUMANITY AWARD for excellence in Oncology Service Category - April 2012
- ✓ ENVIRONMENTAL EXCELLENCE AWARD 2011

Achievements

Clinac Uno - 2002

- India's 1st Integrated In-vivo dosimeter, India's 1st IMRT center & technically
- India's first most advanced system of that time

Integrated Brachytherapy Unit - 2003

- Asia's 1st IBU with imaging capacity inside Brachytherapy room

PET-CT unit - 2009 : Gujarat's 1st PET-CT based Radiotherapy planning

Clinac unique - 2013 : 2nd Linear Accelerator at KCHRC

True Beam STX-2014 : India's 6th True Beam unit

Preventive Oncology

Apart from state of art cancer treatment KCHRC is focusing on cause of diseases and primary level prevention, particularly tobacco induced cancers.

Our team educates school children and teachers about the health hazards of tobacco, carcinogens in tobacco, health burden caused by tobacco and benefits and ways of quitting tobacco by interactive presentation containing texts, interactive graphics and videos.

Every week our team covers at least 2 - 3 schools and has educated more than 110 schools addressing nearly 15 thousand school children and 1 thousand teachers.

Cashless Facility

- BSNL
- HEAVY WATER PLANT
- KANDLA PORT TRUST
- ROTARY CLUB OF GANDEVI
